1(b)(iii) BALANCE SHEET ANALYSIS

Investment in associated companies and jointly controlled entity increased by \$30.2 million to \$218.4 million. During the quarter, the Group purchased additional shares in MobileOne and acquired 30% equity interests in iCELL Network Pte Ltd ("iCELL") and 50% in Premier Data Centres Limited ("PDC").

Current assets of the Group decreased \$15 million to \$121.8 million. This was largely due to receipts from debtors and utilisation of fixed deposits for investments. The increase in the amounts owing by associated companies relates to dividends receivable.

Non-current liabilities of the Group decreased to \$101.2 million as at 31 March 2007 due to repayment of long-term borrowings.

1(c)(i) CASH FLOW ANALYSIS

The Group's net cash from operating activities was lower than the corresponding quarter in the previous year. In 2006, net cash from operating activities benefited from a significant reduction in working capital as a result of payments received on completion of a major project.

Net cash used in investing activities amounted to \$28.5 million in the first quarter of 2007. This was mainly used for acquisitions of equity interests in iCELL, PDC and MobileOne.

Net cash used in financing activities in the first quarter of 2007 of \$0.6 million was largely due to a loan advanced to an associated company. In 2006, the net cash used in financing activities of \$5 million was mainly for repayment of loans.

8. REVIEW OF GROUP PERFORMANCE

The Group's profit before tax and exceptional items improved 4% despite the lower turnover for the quarter compared with the previous year. MobileOne continues to be a significant contributor to the Group, contributing more than 60% of its pre-tax profits.

Profit after tax rose by 14% to \$12.2 million after taking into account deferred tax adjustments resulting from the change in Singapore corporate tax rate from 20% to 18%.

Overall, the Group closed its first quarter with a 21% growth in attributable profit before exceptional items to \$11.8 million.

In the opinion of the Directors, no factor has arisen between the end of the current period and the date of this report which would materially affect the results of the Group and of the Company for the period just ended.

9. VARIANCE FROM PROSPECTS STATEMENT

No variance from previous statement.

10. PROSPECTS

The Network Engineering Division continues to seek project management and engineering work in regional emerging markets. During the quarter, the Group acquired a 50% stake in an Irish data centre company. This acquisition provides a good entry into the expanding data storage market in Europe and the company is seeking additional data storage space to meet the growing demands.

In Logistics, operations in Singapore improved slightly as a result of the improvement in market conditions in the domestic economy. However, in Foshan, although throughput at the port is increasing, tariff rates remain competitive. The Group will intensify its efforts to diversify into non-port logistics activities to generate earnings growth. The recent acquisition in Wuhu Annto Logistics is a step in this direction to provide pan-China distribution and warehousing services.

14. REVIEW OF SEGMENT PERFORMANCE

Network Engineering Division turned in a lower pre-tax profit compared to the corresponding quarter in 2006 because of lower revenue achieved in Malaysia. Newly acquired associated company Premier Data Centres Limited made its first contribution to the Division during the period.

Logistics Division recorded a marginally higher turnover of \$14.7 million on the back of improved warehousing capacity utilisation in Singapore while the Division's pre-tax profit was impacted by lower contribution from associated company, Asia Airfreight Terminal.

MobileOne remains a major contributor to the Investments Division. The Division's earnings were augmented by sundry income of subsidiaries and tax adjustments arising from the downward revision of Singapore's corporate tax rate from 20% to 18%.
