1(b)(iii) BALANCE SHEET ANALYSIS

Group shareholders' fund decreased from \$246.5 million at 31 December 2007 to \$234.1 million at 30 June 2008. The decrease was mainly attributable to payment of final dividend of \$0.06 per share in May amounting to \$33.1 million in respect of financial year 2007.

Group total assets of \$506.8 million at 30 June 2008 was \$17.0 million lower than the previous year-end. Investments in associated companies and jointly controlled entity increased \$7.7 million to \$258.6 million mainly due to equity accounting for share of profits and additional purchase of shares in MobileOne partly set-off by dividends received. Other investments decreased by \$2.3 million to \$15.5 million as a result of fair value adjustments of the financial assets in the current period. Current assets decreased \$23.9 million to \$108.3 million due to reduction in fixed deposits as a result of dividend paid to shareholders.

Group total liabilities increased by \$0.1 million to \$242.9 million mainly due to increase in creditors and taxation as a result of higher operating activities offset by decrease in total borrowings.

8. REVIEW OF GROUP PERFORMANCE

Second Quarter

Group turnover for second quarter 2008 improved by 48.6% to \$34.4 million as compared to \$23.2 million in the corresponding quarter of 2007 due mainly to higher turnover from Logistics Division and inclusion of TradeOneAsia which was acquired in June 2007. Operating profit margin for second quarter 2008 was lower at 4.5% mainly due to increase in operation costs and overheads.

Group profit before tax and exceptional items improved by 15% to \$16.4 million as compared to \$14.3 million in the corresponding quarter of 2007 led by better performance from the Logistics Division. This was partially offset by lower contribution from Network Engineering and data centres.

Profit after tax improved marginally to \$11.6 million due to higher taxation for 2008.

Half Year

Group turnover for the first half improved by 38.4% to \$61.8 million as compared to \$44.7 million in first half of 2007. Group operating profit improved by only 5.2% due to weaker performance from Network Engineering and higher operating costs for Logistics Division.

Group profit before tax and exceptional items improved by 17.8% to \$30.8 million from \$26.2 million mainly due to increase in share of profits from associated companies.

Profit after tax in first half of 2008 declined by 5.3% to \$22.3 million. During the first half of 2007, the Group benefited from write-back of deferred taxation and tax assets recognised under the group relief system of \$4.3 million.

In the opinion of the Directors, no factor has arisen between the end of the current period and the date of this report which would materially affect the results of the Group and of the Company for the half year just ended.

9. VARIANCE FROM PROSPECTS STATEMENT

No variance from previous statement.

10. PROSPECTS

The Logistics Division will continue to leverage on its core competency and branding in Singapore and focus on growing its logistics markets in China, Vietnam, Indonesia and Malaysia. Logistics' activities in China are expected to continue to grow, although in the short term, continuing credit tightening and higher fuel costs will be some of the challenges to overcome. Outlook for logistics in Vietnam is encouraging with the relocation of manufacturing base to Vietnam and increasing consumption patterns.

Demand for good quality top-tier data centres in Europe remains good with active enquiries.

The Group will focus on logistics and data warehousing as its main strategic thrust to capitalise on the opportunities in both Asia and Europe.

14. REVIEW OF SEGMENT PERFORMANCE

Logistics Division turnover was higher by 55% compared to first half of 2007 largely due to an increase in warehousing and distribution services in Singapore and contribution from TradeOneAsia which was acquired in June 2007. Profit before tax and exceptional items of the division improved by 58% due mainly to higher profit at operating level from Singapore and Foshan as well as improved profit contribution from Annto. Profit after tax of \$7.2 million improved by 31% despite the absence of tax asset of \$1.0 million recognised in 2007.

Network Engineering Division's profit before tax and exceptional items was slightly lower at \$3.1 million in the first half of 2008 because of weaker performance from its Malaysian operations offset by higher contributions from its associated companies.

Investments Division's profit before tax and exceptional items was higher at \$19.8 million compared to first half of 2007 on the back of higher equity stake in MobileOne. Profit after tax in the first half of 2008 decreased compared to last year because of higher taxation charge. During the first half of 2007, the division's profit after tax was boosted by deferred tax adjustment arising from a reduction in Singapore's corporate tax rate and the recognition of tax asset.
