CONNECTED.

Keppel Data Centres

WHO WE ARE

Keppel Data Centres is the manager and operator of premier data centres across Asia-Pacific and Europe. Through our parent company, Keppel Telecommunications & Transportation Ltd, we have more than 12 years of experience in designing, building and managing data centres that support our clients' mission-critical systems.

As a trusted data centre solutions provider, we help you achieve your business goals by working with you at every step to design and build data centre suites to your specifications.

We are the preferred service provider in the data centre industry. We offer a comprehensive range of colocation, build to suit services, as well as double and triple net lease arrangements to a large client base that includes leading blue chip companies, financial institutions and government agencies which demand high availability and minimal downtime to their systems.

ROBUST, RESILIENT, RIGOROUS.

We understand the pivotal role that data centres perform in critical business functions. That is why our carrier-neutral data centres are located in key first-tier data centre cities across Asia-Pacific and Europe, and fitted out to Tier III specifications.

WE DELIVER:

- Flexible data centre solutions that suit your business requirements: build to suit, colocation or double and triple net lease arrangements
- Customisable data centre services that range from turnkey solutions to smart hands services by a dedicated team of experienced professionals
- Highly resilient and scalable power infrastructure with multiple redundancies
- Carrier neutral connectivity as well as connectivity via a preferred carrier
- Robust physical security and emergency response measures optimised for data centres
- Business continuity and disaster recovery space

ONE-STOP SOLUTION

ENVIRONMENT

CONNECTIVITY

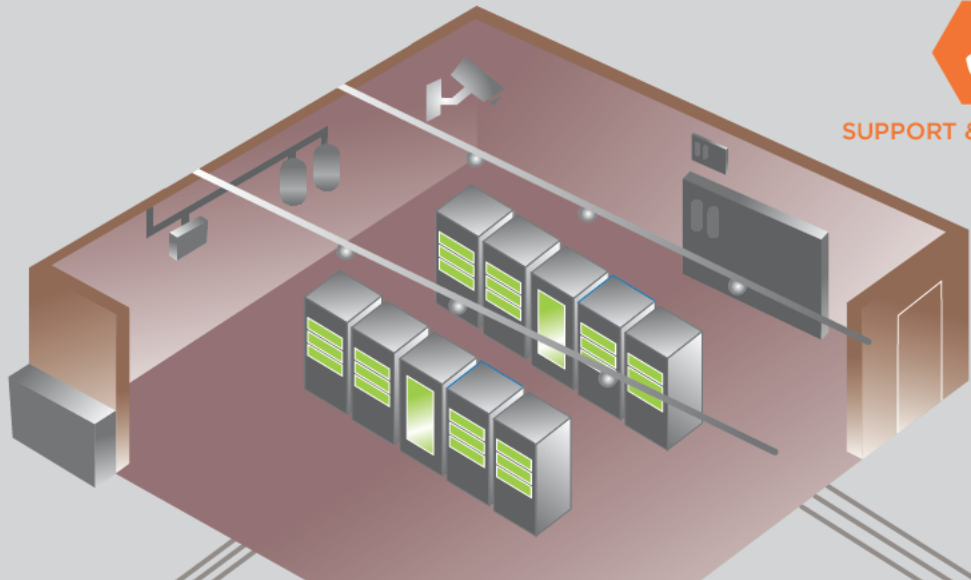

SECURITY

SUPPORT & MONITORING

POWER

ENVIRONMENT

- Temperature and humidity maintained at industry accepted standard and within energy efficient parameters
- Precision cooling by chilled water based cooling system in 2N redundant configuration
- Very Early Smoke Detection Apparatus (VESDA) system, gas based primary fire suppression system backed by pre action sprinkler system
- Water Leakage Detection System
- Concurrently maintainable infrastructure

SECURITY

- 24 x 7 x 365 security
- Integrated CCTV surveillance with 24 x 7 monitoring
- Anti climb fence and reinforced concrete perimeter walls
- Barrier controlled vehicle access
- Access control using proximity card and biometric readers with 2 factor authentication and man trap entry

POWER

- Dual incoming power feeds
- Redundant power paths to each rack
- 2N redundancy in power distribution, UPS systems and generator backup
- Ability to support power density of 1.5 kW/m² or more with associated cooling solution
- Diesel generators with onsite fuel tanks backed by dual diesel supply delivery contract
- Concurrently maintainable infrastructure

CONNECTIVITY

- Secure, dual MDF with diverse risers to every floor
- Carrier neutral and catered to multiple network providers

SUPPORT & MONITORING

- Real time monitoring of all mission critical environments and systems of data centre infrastructure
- Reports on maintenance, testing, incidents and environmental conditions can be provided to customers

PROVEN TRACK RECORD

We have a proven track record of building, owning, and operating data centres across Asia-Pacific and Europe through Keppel Telecommunications & Transportation and Keppel DC REIT.
